

Sit Green.

Love the planet? Pull up a chair.

Everybody talks green. We put it into practice.

At MTS, conservation is more than green speak. It's an aggressive initiative that colors everything we do. SynerGreen, our continuous environmental improvements philosophy, offers real-world processes and products in place of platitudes. We go beyond mere compliance to provide a "greenprint" for transforming our entire manufacturing operation. Because our goal is not to be "less bad", but to help make our water, air and planet - better. From reducing our emissions and conserving energy, to recycling resources to support sustainability, mother earth takes a front row seat at MTS.

- MTS is the first and only hospitality seating manufacturer to earn the GREENGUARD® Indoor Air Quality Certification. Result of rigorous testing that met criteria defined by the GREENGUARD® Environmental Institute.
- Participates in carbon offset program equal to 100 percent of our business travel.
- 10% of power purchased from renewable resources through local grid, thereby reducing carbon footprint
- 84% of product materials easily recycled and many chairs made with recycled content of 20% or higher
- Cyclone-based powdercoat reclaim technology eliminated more than 600,000 pounds of waste in past three years
- Recycled more than 3 million pounds of scrap from manufacturing facilities in each of last five years
- All manufacturing facilities and offices utilized energy-efficient T8 fluorescent lighting - eliminating 530,000-kilowatt hours, 800,000 pounds of carbon dioxide and nearly 1.4 million pounds of sulfur dioxide in '07.
