

INCASE[™]
CRYPTON[®] TECHNOLOGY

Tried. Trusted. Proven Performance.

The inventors of Crypton Fabric offer you the most advanced, environmentally friendly fabric protection treatment on the planet...INCASE Crypton Technology. Using C6 chemistry, INCASE is designed with the flexibility to deliver the most effective formulations that will work best with each fiber content.

With amazing cleanability, increased durability, and stain, odor and microbial resistance using Silver Ion technology, INCASE adds value to your fabric for years to come. And, like all Crypton products, INCASE is environmentally friendly and made in a green facility, so it's not only helping you, it's helping the environment, too.

Choose your fabric and protect your investment, just INCASE.

INCASE FABRIC PROTECTION

The case for INCASE:

- Permanent protection built into every fiber
- Extreme stain repellency and soil release makes cleaning easy
- Silver Ion antimicrobial protection
- Improved abrasion resistance
- Can pass stringent flammability requirements
- Made in the USA

All things Green:

- No Harmful VOC's, no formaldehyde
- No halogenated flame retardants (FR's), no PBDE's
- Contributes to the LEED-CI credit for Low Emitting Materials
- Sterling Planet Verifiable Emission Reductions and Green-E Renewable Energy Certificates
- SCS Indoor Advantage Gold
- Recyclable
